## **DETAILED ACTION**

### ***Response to Amendment***

The examiner acknowledges amendments to claims dated 9/18/2006. The amendments are accepted as proper in that no new material has been incorporated into the application. With the amendments:

claim 1 is amended to incorporate the allowable material of now canceled claim 6;

claim 11 is amended to incorporate the material of now cancelled claim 13;

claim 23 has been amended to add a statement on the utility of the claim.

### ***Response to Arguments***

Applicant's arguments, see Remarks/Arguments, filed 9/18/2006, with respect to claims 11; 1-5 and 10; 12-13 and 17; and 23 have been fully considered and are persuasive. The rejections of 1-5 and 10; 11-12 and 17; and 23 has been withdrawn.

### ***Allowable Subject Matter***

Claim 1-5, 7-12 and 14-30 allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Claim 1 is allowable over prior art for all the indented limitations, but especially the limitation:

wherein the controller selects one second resolution PWM control signals corresponding to a selected rotation speed of the cooling fan, wherein the second resolution control signals are higher resolution than the first resolution PWM control

signals, and wherein the combination of different first resolution PWM control signals approximates the selected resolution signal.

Claim 11 is allowable for all the indented limitations, but especially the limitation: wherein the control means selects one step corresponding to a selected rotation speed of the cooling fan from the information of the steps of the second resolution, wherein the combination of the different PWM control signals in the predetermined time ratio approximates the selected one step of the second resolution.

Claim 23 is allowable for all the indented limitations, but especially the limitation: generate a driving pattern for driving the device that approximates the selected second resolution driving pattern using a combination of the selected at least two first resolution driving patterns at a predetermined ratio.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert W. Horn whose telephone number is 571-272-8591. The examiner can normally be reached on Monday-Friday 7:00-3:30 EST.
